

Automate due diligence

Save time. Lots of it! Let AI/ML do the work for you. Benefit from our algorithms across the M&A lifecycle. Artificial intelligence will help you with index creation, document insight, folder suggestions and more. The best part is, we already trained the machine and its ready to go when you are. Built right into the Datasite platform. Stay in control of your transaction at an accelerated clip.

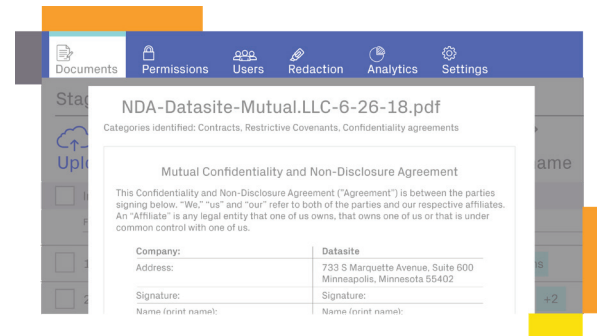

Smart Categorization

Accelerate deal preparation using Datasite's machine learning engine trained on over 3 million documents. Obtain categorization suggestions. Find associated documents.

Indexed by AI

Unsure of where a PDF, DOCX, or PPT belongs in the Index? Run the document through OCR and our AI will allocate it to the appropriate folder even if its nested 3 levels down. All you need to do is confirm its location.

Preview Content

Unsure of where a document belongs? Simply hover over it, learn what the first page says and confirm it belongs to the due diligence preparation cycle. Unable to read a foreign language document? Let us translate it for you.
